IMAGES THAT REFLECT YOUR LIFESTYLE

"You don't take a photograph, you make it."

Ansel Adams

#1 YOUR PLANNING MEETING

We invite you in for a relaxing chat over a cup of coffee to discuss your photo shoot. We want to find out what makes you and your family unique.

PREPARATION FOR YOUR SHOOT

- Keep clothing simple: comfortable everyday clothes in similar tones look best in photos.
- Avoid very bright and bold prints or stripes as they can be photographically distracting.
- If young children or pets are involved, how about bringing along some of their favourite props?

#2 YOUR PHOTO SHOOT

Come to your shoot relaxed and ready for fun.

Experience the joy of being together in a relaxed setting, while we keep your session dynamic and fun. You will be rewarded with unexpected natural images. No awkward poses or stiff smiles; just naturally beautiful images you will love.

Your photo shoot should take about an hour depending on how many people are involved.

After your shoot, our image design team goes to work; editing and polishing your images so that you only see the very best 30 to 50 images from the shoot.

#3 YOUR DESIGN CONSULTATION AND ORDERING EXPERIENCE

The week following your photography session, you will be invited to come back for your ordering and viewing presentation.

To prepare for your viewing presentation, walk around your home and look at your wall space. Find places of social warmth & focal points in your home that are uncluttered and will add life and personality to your home.

Measure up this space, take photos and email them to us so we can help scale and match your image designs to your home.

Your selection presentation is the really rewarding part; you get to re-live the fun of your photography session and be captivated and inspired as your story unfolds before you in our theatre room.

After your initial slideshow we will go through your images one by one, selecting your favourite must-haves.

From this list we guide you on how best to display your personal wall art, which you will be able to order at this time so that you can own it forever.

Choose between traditional wall prints, wrapped canvas's, acrylic prints, art mount collage or even our hand-made story book albums.

Most clients invest between \$850 and \$3,500 in their personal wall art.

Display them with pride.

Enjoy them for life.

"Images last forever, our minds don't - capture what you can before the time runs out." - Sam Pope
